

**We oppose the removal of A & E and acute services from St Helier Hospital**

W 3 ①

We the undersigned oppose the removal of A & E and acute services such as maternity, paediatrics, high dependency unit, and coronary care from the St Helier site. Removal of these services will result in the loss of patient numbers, acute beds, surgical theatres, consultants and significant financial revenue from St Helier. Furthermore we oppose the building of the new acute specialist facility adjoining Royal Marsden hospital because of lack of transport facilities, increase in travel time and all the reasons stated above. We believe that St Helier site needs investment but removal of acute services will render it unviable in the longer term.
